

March 29, 2017

Dear Members of the Minnesota Senate:

We, the undersigned organizations and the citizens we represent, ask you vote NO on the Senate Omnibus Environment and Natural Resources Budget Bill, S.F. 723. We do not make this request lightly. This bill will roll back environmental protections and erode the basic foundation of Minnesota's legacy of protecting our Great Outdoors. The bill contains many provisions that undo existing protections and make it more costly and time consuming to adopt new protections for our state's air, land, lakes, rivers and streams.

In addition, at a time when the state's coffers are full, this bill makes historic cuts, effectively raiding \$40 million in general public support from the core work of protecting our Great Outdoors. The impacts of this nearly 13% cut in support will be compounded if the significant cuts in grant funds to the state, proposed by the Trump Administration, are adopted. These combined cuts threaten the long term viability of major areas of work for the citizens of our state.

This bill is out of sync with Minnesota voters. Just last month, our extensive statewide issue poll found that 20% of voters think our environmental laws are at the right levels and fully 62%, from all corners of the state, would like to see environmental laws be made tougher or enforced better. Yet this bill goes in the opposite direction.

Senate File 723 includes a large number of policy provisions that obstruct or prohibit the state agencies, charged with protecting our water and controlling pollution, from carrying out their functions and duties. Some of these duties are delegated to Minnesota under the Federal Clean Water Act, and legislative action interfering with the state's ability to carry out delegated duties puts Minnesota at odds with the Clean Water Act.

Though what follows is not a comprehensive list, we are deeply concerned that this bill:

Unravels Buffer Protections for Habitat and Water Quality (Art. 2, Sec. 74, Lines 23, 28-29 (p. 67), Lines 20-21 (p. 68); Sec. 75, Lines 3-5 (p. 69) and 9-12 (p. 70).)

- Limits the 50-foot buffer requirement to only those waterways that have a shoreland classification, leaving all other waterways subject to only the 16.5 foot buffer requirement. This exempts 200,000 acres and 24,000 miles of watercourses from 50-foot buffer requirements, rolling back water protections that were in place before passage of the 2015 buffer law.

- Eliminates the buffer requirement altogether unless the state or federal government pays for the entire cost of establishing the buffer as well as annual payments or an easement for the land.
- Delays implementation of the Buffer Law for 2 years, despite Board of Water and Soil (BWSR) and local Soil and Water Conservation District (SWCD) reports that most counties already have 60 – 100% compliance with the law.

Hobbles the MPCA and DNR from carrying out their duties. (Art. 3, Sec. 4 & 14):

- Bars the MPCA from enforcing against any permittee or polluter any guidance, policy, or interpretation that meets the definition of a rule under Minn. Stat. 14.02, without first conducting full Chapter 14 rulemaking, and creates a presumption against the agency in any challenges alleging that MPCA is enforcing an unadopted rule. The guidance, policy, and other interpretations provided by the MPCA is intended to answer common questions, typically from regulated parties, about how the MPCA’s rules and state law would be applied, without resorting to court action.
- Establishes presumption that DNR and PCA guidance documents are invalid, unpromulgated “rules.” This makes environmental regulation much more complex, time consuming and expensive – it’s the opposite of streamlining. It also invites litigation. Guidance documents that are truly being used inappropriately can already be challenged in court under existing law.

Takes the science out of agency decisions. (Art 3, Sec. 9, Line 107.25-11.6):

- Eliminates deference to PCA’s science when a water quality decision is challenged, and creates a special process for municipalities to end run existing expertise and challenge agency decisions. This is a favor for a few municipalities that want to re-fight a losing battle over the state’s river eutrophication standards. Their science and arguments haven’t held up in front of agencies or courts, and this section creates a new opportunity to rehash the same arguments at taxpayer expense.

Delays actions to clean-up polluted drinking water. (Art. 2, Sec. 114, Line 100.27-101.6):

- Exempts cities that build new facilities from future technology updates to meet standards for clean water for 16 years. This provision broadly delays actions to clean-up pollution and creates more uncertainty for operators because it puts state-issued water pollution permits at odds with federal Clean Water Act requirements.

Suspends water quality standards and rules. (Art. 3., Sec. 18, line 122.10-122.20):

- Suspends water quality standards adopted between mid-2014 and mid-2019 if a facility would have to make updates to protect water quality. This section aims to block standards that protect rivers from algae-causing pollution and new standards proposed for pollutants such as sulfate or nitrate. This could lead MPCA to rely more on less-certain narrative standards, and put MPCA at odds with the Clean Water Act, which requires compliance with EPA-approved standards such as the river eutrophication standard.

Doubles the size a large feedlot can be before mandatory environmental review is required from 1,000 animal units to 2,000 in virtually all cases. (Art. 3, Sec. 15, lines 119.23-119.27):

- Removes the requirements for a mandatory environmental assessment worksheet for an animal feedlot facility with a capacity of less than 2,000 animal units, unless the feedlot will be in an environmentally sensitive area. The current standard is very generous impacting only the largest 7% of feedlots in our state and is so large that only 9 factory farms were required to do an environmental review in 2016.

Eliminates public participation in mining permits (DNR). (Art. 3, Sec. 6):

- Eliminates the right of affected citizens and local governments to have a “contested case” on mining permits. A contested case is an opportunity to present evidence, question industry and agency experts, and build a solid record to support smart decisions, including how lands can be reclaimed and what type and amount of financial assurance should be required from mining companies. Since 1969 this has been a right of citizens, guaranteeing public participation in important decisions that affect the whole state.

Allows corporations to write their own environmental impact statements. (Art. 3, Sec. 17):

- Puts the fox in charge of the hen house, allowing corporations to author their own environmental impact statements and restricting the government’s role to “review, modification and determination of completeness and adequacy” of an EIS. This is antithetical to the whole point of environmental review, which is to allow the regulator (and public) to gather information about environmentally destructive projects and alternatives. It also prevents the public from accessing all of the underlying data and analyses that support the EIS because private companies are not subject to data practices laws.

Requires DNR and PCA to issue draft permits within 150 days. (Art. 3, Sec. 1 & 11):

- DNR and PCA are already issuing more than 90% of permits in line with statutory streamlining goals. This mandate is a one-size-fits-all requirement that does not recognize that some projects are located in sensitive areas or are simply too big or too complex to be permitted within such a short period.

Removes requirement to adopt air quality rules for silica sand. (Art. 2, Sec. 107):

- Removes the requirement that the MPCA must develop ambient air quality standards for frac sand mines. Long-term low level exposure to silica dust can cause silicosis, which is fatal.

Prohibits rules regarding use of lead shot. (Art.2, S. 59):

- Restricts the DNR from using existing authorities to reduce non-target mortality of birds (including Bald Eagles) and wildlife exposed to lead shot. Steel shot is readily available, performs similarly as lead, costs the same or less, and is non-toxic to birds and wildlife that ingest it. Modern ballistics have developed many superior ammunition loads and restricting the use of toxic lead shot makes environmental sense and does not impact Second Amendment rights.

Interferes with science-based forest planning process at Sand Dunes State Forest. (Art. 2, Sec. 113):

- This provision does an end run around the existing well-established, science-based forest planning process that includes the involvement of local representatives. It also suspends the authority to restore any part of the forest to native oak savannah, of which less than 1% of Minnesota's original oak savannah forest remains.

Prohibits local government from banning or placing fees on plastic bags. (Art. 2, Sec. 105):

- Banning or charging a fee on plastic bags is a proven effective method of reducing air and water pollution, protects wildlife and human health by keeping plastic out of our food stream and can provide significant economic savings to communities. Local communities have already democratically voted to implement a bag ban, and this pre-emption bill erodes local control and overrides the political will of the residents.

Lastly we would like to object to the insertion of the large amount of unrelated policy language into this biennial appropriations bill. This action ignores the strong objection Governor Dayton expressed in his letter to Senator Gazelka on March 13, 2017. As many of the policy provisions that have been added to this bill are highly unpopular with the voting public, this combining of budget and policy provisions allows these issues to avoid the public process and scrutiny they would receive otherwise. These unpopular issues should be required to stand on their own as separate policy bills.

This bill is not right for the shared legacy of Minnesota's Great Outdoors and it is not acceptable to Minnesota voters. Please vote no on SF 723.
